INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

This Information disclosure Statement is submitted under 37 C.F.R. §1.97(b).

Applicant(s) submit herewith Form PTO 1449-Information Disclosure Citation together with copies of patents, publications, or other information of which applicant(s) are aware, which applicant(s) believe(s) may be material to the examination of this application and for which there may be a duty to disclosure in accordance with 37 C.F.R. §1.56.

The following patent document is known by the Application and has been determined to be relevant to the pending patent application (copy enclosed):

1. U.S. Patent No. 6,511,442

The '442 patent relates to an evaluation and training systems using EMG sensors. As shown in the patent, the system includes feedback means to manipulate the environment outside of the immediate surroundings of the user. However, the '442 patent does not provide a dynamic feedback control system, as claimed by Applicants. A comparison of the '442 patent with Applicant's invention illustrates new, useful and non-obvious features. Applicants have created a robotic apparatus and an associated method for controlling the robotic apparatus that includes a dynamic feedback control system without the use of EMG sensors.

The relevance of the attached reference is that this is the closest art of which Applicants are aware. Applicants submit that the above reference taken alone or in combination other prior art references of record neither anticipates nor renders obvious the present invention. Consideration of the foregoing in relation to this application is respectfully requested.

It is requested that the information disclosed herein be made of record in this application.

Respectfully submitted,

By:
